Subject: Nano Green Technology's CCS-1000

Reference: Earth Tech Microelectronic Services Report Number 2837AX1

Dear Mr. Mor,

Earth Tech Microelectronic Services has completed toxicity testing using SEMI[®] F15-93 methodology of the Nano Green Technology's CCS-1000. An F15 test was conducted on the Nano Green CCS-1000 tool to simulate a single fault worst case scenario leak of ammonia. The test results and test conditions are documented in the Earth Tech report 2837AT1. The results of the testing by Earth Tech Microelectronics on the Nano Green Technology CCS 1000 system demonstrate compliance to the F15 tracer gas testing requirements.

Sincerely,
Earth Tech Microelectronic Services

Steve Trout
Senior Product Safety Engineer

Chris Evanston
Program Manager
